

CASE STUDY

Service: Car Park Surface Coatings

Project: Tesco Stores

Location: Kensington, London

Installation overview

Following a site inspection by the stores chief executive the main contractor was given 1 week to refurbish the car park deck around the main entrance to this flagship store. Due to tight time scales the work had to be carried out during the night without disruption to the operation of the store which was open 24 hours.

Special considerations

With vehicular movements and pedestrians in the vicinity special attention to safety had to be considered. This included the type of preparation and the product selection that had to be low odour and fast curing. With all of this in mind ERS successfully sourced a material that met the criteria and the work was carried out with minimal disruption and in time for the store to be re-inspected.

Why ERS was selected

With the ability to source materials from many of the countries leading manufactures, and because we are fully approved and certificated in the use of all of their product ranges ERS has the ability to react at short notice with full manufacturers back up.

Euro Resin Solutions Ltd. is a highly professional and expert installer of resin flooring solutions, well equipped to meet the demands of real industrial and commercial environments.
